

## Important: CD-RW, VGA & UTP versions NOT STOCKED

This is an integrated digital video recorder that combines the features of a time-lapse audio / video recorder, a multiplexer, and a video server to create a single security CCTV solution.

Its outstanding triplex operation enables users to view live or playback recorded video, and remote access through network simultaneously, while recording other video, and to view wanted recorded video instantly by entering the time and date or selecting recorded video from the event list.

DVR includes **Remote Lite**, the remote viewing software that is a Web-browser plug-in, allows user to view live or recorded video images. The remote software is stored in DVR and deployed over a LAN, WAN or Internet connection to remote Windows-based computers. This simplifies the installation and maintenance of the software components so all remote users are kept up to date.

Below lists the front/ rear panels of DVR family, the number of channels is only one of the differences among the three models.

### 4ch

### 8ch

16ch

## 1.1 Product Key Features

The DVR offers advanced features not typically found in standard multiplexers; it integrates the full features of a DVR, multiplexer and video server (by using the software **Remote Lite**). The key features of DVR are listed as follows.

- MPEG-4 high quality compression, 5~10 times smaller than MJPEG
- Triplex operation (recording, playback and network access)
- Remote monitoring, instant recording and dome camera control via Ethernet
- VGA output version **(NOT STOCKED)**
- Live display: 120pps (NTSC)/ 100pps (PAL)
- 2 Channels, in & out, for audio recording
- Support up to 2 internal HDDs
- USB2.0 port for video clip exporting, support USB ThumbDrive®
- Easy software upgrade via USB ThumbDrive®
- Export DVR file which can be played via **Player**
- **Player** application software will be attached with exported disks
- Multiple built-in dome camera protocol: DynaColor, Pelco D, Pelco P, AD422 and Fastrax 2.
- Digital Zoom 2X2, available in live mode
- Pre-Alarm recording
- IR Remote controller **(NOT STOCKED)**
- Multiple language on-screen menus
- Network software supports static IP and DHCP
- Support RS-485 remote control keyboard **(NOT STOCKED)**

## 1.2 Product Application Diagram

Connect the unit with other devices as shown in the system diagram to complete a video surveillance solution. The figure shows also the expandability and flexibility of this digital recording system.

## 2. System Setup

The notices and introduction on system installation will be described particularly in this chapter. Please follow the description to operate the unit.

In order to prevent the unit from data loss and system damage that caused by a sudden power fluctuation **use an Uninterruptible Power Supply (UPS)**.

### 2.1 Position the Unit

Position / mount the DVR in a proper place and be sure to power off the unit before making any connections. The placed location should avoid hindering or blocking the unit from airflow. **Enough airflow is needed to protect the unit from overheating.** The maximum allowable temperature of operating environment is 40°C.

The unit utilizes heat-conducting techniques to transfer internal heat to the case, especially to the bottom side of the unit.

**NOTE: Be sure not to remove the rubber feet, and always leave a space for air ventilation on the unit's bottom side.**

## 2.2 Selecting Video Format

The DVR is designed to operate under either NTSC or PAL video formats. The switch is positioned on the rear panel.

## 2.3 Connecting Devices to the Unit

This section lists some **important notices that should be read before making any connections** to the DVR.

**NOTE:** Connect short-term devices, such as USB ThumbDrive®, USB CD-RW, USB Hard Disk Drive, etc., only after the unit is successfully powered up.

### **Connecting Required Devices**

Before power up the unit, you should connect cameras and a main monitor to the unit for basic operation. If needed, connect a call monitor for displaying full screen video of all installed cameras in sequence.

### **Connecting Short-term Device**

If you plan to install any short-term devices to the DVR and use them as part of the unit system, such as USB CD-ROM, USB Hard Disk Drive, etc, **make sure those devices are connected only after the unit is powered up.** Because DVR can recognize the external devices only after the power-up process is done completely.

## 2.4 Rear Panel Connections

There are various connectors on the rear panel used for DVR installations. The following figure shows the connectors by name; and followed by the detailed description of each connector.

### LAN Connector (RJ-45)

The DVR is capable of networking. The LAN port opens the door of DVR to Ethernet.

### USB Connector

There is a USB 2.0 port on the front panel for users to connect external USB devices to the unit, such as ThumbDrive®, CD-RW, DVD-RW.

### Audio In / Out (x2)

The DVR provides two sets of audio recording.

Audio In RCA connector is offered for connecting an audio source device (e.g. external amplified microphone) to the unit; Audio Out RCA connector is offered for connecting an audio output device (e.g. amplified speakers) to the unit.

### Call Monitor (for 8ch and 16ch Models only)

The call monitor is used to display full screen video of all installed cameras in sequence. The BNC call monitor connector allows user to connect the unit with an optional call monitor.

### Main Monitor (BNC/ VGA)

BNC and VGA output connectors are offered for connecting to a main monitor. The main monitor displays live image and playback recorded video in either full-screen or split-window format. VGA output version **NOT STOCKED**.

**Video System Switch**

It is used for adjusting the video system of the unit.

**Video Input**

A group of BNC connectors are available for video input streams from installed cameras.

**Alarm I/O & RS485**

The unit provides an alarm I/O and RS485 port that offers user the flexibility required to connect the unit to the other device. The pin definition for each model is listed as below tables:

**Pin Definition for 4ch-Model:**

Pin	Definition	Pin	Definition
1	ALARM OUT O	9	Alarm Out C
2	ALARM OUT COM	10	GND
3	RS485 D/R+	11	-
4	RS485 D/R-	12	-
5	ALARM In 1	13	-
6	ALARM In 2	14	-
7	ALARM In 3	15	-
8	ALARM In 4		

**Pin Definition for 8ch/16ch Model:**

Pin	Definition	Pin	Definition
1	ALARM OUT O	14	Alarm OUT C
2	ALARM OUT COM	15	GND
3	RS485 D/R+	16	GND
4	RS485 D/R-	17	Reserved
5	Reserved	18	ALARM In 9 (for 16ch only)
6	ALARM In 1	19	ALARM In 10 (for 16ch only)
7	ALARM In 2	20	ALARM In 11 (for 16ch only)
8	ALARM In 3	21	ALARM In 12 (for 16ch only)
9	ALARM In 4	22	ALARM In 13 (for 16ch only)
10	ALARM In 5	23	ALARM In 14 (for 16ch only)
11	ALARM In 6	24	ALARM In 15 (for 16ch only)
12	ALARM In 7	25	ALARM In 16 (for 16ch only)
13	ALARM In 8		

**Power Jack**

The DVR has a DC power connection **use Mains Adaptor supplied with DVR.**

**NOTE:** Use of other power adapter will damage DVR.

**UTP version NOT STOCKED**

Short for Unshielded Twisted Pair, which is a popular type of cable. Due to its low cost, UTP cabling here is used for replacing BNC cabling.

There are plenty of UTP connectors positioned on the rear panel of each unit. Next to these connectors places a switch used to enable or disable this function. Each switch (4ch DVR only has one switch and 4ch/ 8ch DVR has two) each Bank has four switches on it. These DIP switches are numbered and each number corresponds to a camera. Note that BNC are alternative methods of access for video input cabling, which means if you chose BNC for Camera 1, than you have to disable its UTP function.

**NOTE:** UTP cable transfers not only Video Signal but also power for cameras.

### 3. General System Setup

The DVR allows user to access some general operations through the front panel easily. The following subsections introduce the general operations of the unit.

The regular displayed OSD information and its displayed positions are shown as following figure. The channel title will be displayed on the top-left side of the window, either in full screen mode or in multiple channel mode. The current operating mode, including Call mode, Dome-Control mode, Playback mode. Freeze mode and Sequence mode, will be displayed on the bottom-left side of the screen. And the date/ time information will be display on the bottom-right side.

## 3.1 Front Panel Introduction

The front panel controls enable user to control the unit and preset the programmable functions.

### 3.1.1 LED Definition

The DVR LEDs on the front panel are described as follows.

#### **Power LED (Green)**

The LED lit during the period when the correct power is connected.

#### **Network LED (Green)**

The LED should be lit when DVR is connected to a network and blink when the data is being transferred.

#### **Alarm LED (Red)**

The LED should be lit during an alarm is triggered.

#### **REC LED (Green)**

The LED should blink while the DVR is recording.

## 3.1.2 Function Keys

The DVR functional keys on the front panel for normal operation are described as follows.

### CHANNEL

- When in both Live and Playback modes, press the CHANNEL key to view the corresponding video in full screen. The number of the CHANNEL keys corresponds to the number of cameras supported by the unit.
- When in dome control mode, the key named “1” is used to access the Set/Go preset menu; the key named “2” is used to hide or display the dome setting parameters.

### DOME

Press the key to enter dome control mode.

### MODE

Press repeatedly to select for wanted main monitor display format. There are three available view modes: full screen and 4-window (2x2).

### SEQ (Sequence)

Press to start automatic sequencing of the video coming from the installed cameras.

### MENU

Press the key to call the OSD setup menu.

### ESC

Press to cancel or exit from certain mode or OSD menu without changing the settings made previously.

**ZOOM/ENTER**

- In OSD menu or selection interface, press the key to make the selection or save settings.
- In live full screen view mode, press to view a 2x zoom image; press it again to exit zoom mode.

**COPY**

In Playback mode, press COPY to select the start and end point of the video you want to export. More detailed information refer to Section 4.4 Video Export.

**PLAY/STOP**

Press this key to switch between live image and playback video.

**FREEZE**

- Press FREEZE while viewing live image, the live video will be frozen. The date / time information shown on the monitor will continue updating. Press FREEZE again to return to live mode.
- Press FREEZE while playing the recorded video, the playback video will be paused. Press LEFT / RIGHT to move the recorded video reverse/ forward by single step. Press FREEZE again to continue playing video.

**SEARCH**

In both Playback and Live mode, user can press SEARCH to call the Search menu for searching and playing recorded video by date and time or events.

**Direction Keys**

- In Zoom mode, these keys function as Direction keys.
- In the OSD menu, the Direction keys are used to move the cursor to previous or next fields. To change the value in the selected field, press UP/ DOWN.

## 3.2 Power Up / Down the Unit

If you must shut down the DVR for any reason, please use the proper shut down and power up procedures to avoid damaging your DVR unit.

### To Power Up the Unit

Check the used type of power source before plug in your DVR first (the unit accepts the power input between AC100V to AC240V)

The color bar and system checking information will be shown on the monitor and disappear when the unit has been completely powered up.

### To Restart / Shutdown the Unit

Press MENU and input the administrator password to access the OSD Main menu. Select <Shutdown> in Main Menu and press ENTER to enter the Shutdown menu, which displays as follows.

Shutdown		
1. Power Off		Execute
2. Reboot		Execute

#### **<Power Off>**

Select this item to shut down the unit. Do not remove the power during shut down until the message "You can safely turn off DVR now!" displays.

#### **<Reboot>**

Select this item to reboot the unit. The color bar and system checking information are displayed on the monitor until the unit is completely restarted.

### 3.3 Entering OSD Setup Menu

The OSD Main menu contains a list of items that are used to configure the DVR. To enter the Main menu, press MENU and then enter Administrator or User password. The Password Verification screen displays as follows.

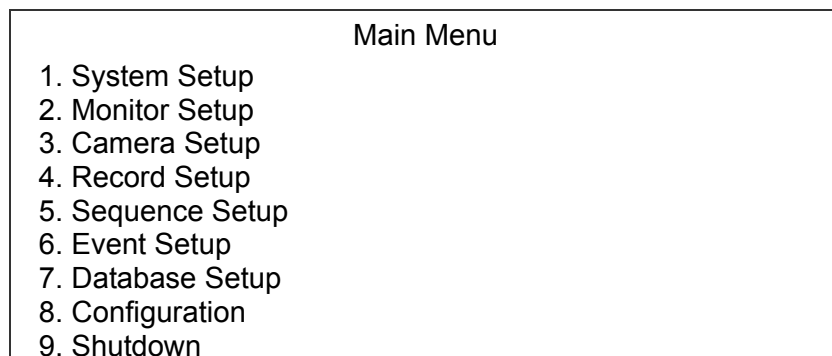

The default passwords are shown in the following table. The same passwords are used for entering the remote viewing software DynaRemote Lite.

Administrator Password	User Password
1 2 3 4	4 3 2 1

**NOTE:** It is strongly suggested to change the passwords to prevent unauthorized access to the unit.

After entering the correct password, the Main menu is displayed.

Move the cursor up / down over the OSD items using the Direction keys and press ENTER to enter the selected sub-menu.

## 3.4 System Date / Time Setting

User can set the current date, time and other OSD parameters in Date/Time menu. The administrator's privileges are required for entering the submenu. In OSD Main menu, select <System Setup> and press ENTER, then select <Date/Time> to access the Date/Time menu; the menu displays as follows.

Date/Time	
1. Date	2005/02/21
2. Time	PM10:39:26
3. Date/Time Display	1 Row
4. Date Display Mode	Y/M/D
5. Time Display Mode	24 HR
6. Date/Time Order	Date First
7. Daylight Saving Time	OFF
8. DST Start	Apr, 1 st Sun, 02:00
9. DST End	Apr, Last Sun, 02:00
10. DST Bias	60 Min

### 3.4.1 Set Date / Time

#### Set Date / Time

Select <Date> / <Time> and press ENTER for adjusting the settings. LEFT / RIGHT keys are used to move the cursor to previous or next field, ENTER is for selecting, and UP / DOWN are used to change the value in the selected field.

**NOTE:** The reset date / time setting applies to record new video, the date and time of previously recorded video will not be changed.

**NOTE:** To avoid record database corruption, after changing the date / time setting, it is recommended to clear the database.

#### Date / Time Display

Users are allowed to choose to set the date / time OSD displays in 1 or 2 rows. Use the UP / DOWN keys to change the setting. The default is to display the date / time OSD in one row.

#### Date Display Mode

This function allows user to set the OSD display type of the date / time. There are three options to select from: <Y/M/D>, <M/D/Y> or <D/M/Y>. "Y" represents "Year", "M" represents "Month" and "D" represents "Day".

Move to the item and press ENTER, the option starts blinking. Use UP / DOWN keys to change the setting. The default setting is <Y/M/D> in both NTSC / PAL formats.

### **Time Display Mode**

User can choose to set the time format to <12 hour> or <24 hour>. Use the UP / DOWN keys to change the format. The default setting is <24 hour>.

### **Date / Time Order**

The item is used to set the order of date / time display to <Date First> or <Time First>. Use UP / DOWN keys to change the setting.

## **3.4.2 Daylight Saving Time**

### **Daylight Saving Time**

The item is for those people who live in certain regions to observe Daylight Saving Time. Select <ON> to enable, or <OFF> to disable the function.

If the function is disabled, the DST Start / End time and DST Bias will be grayed out and cannot be accessed.

**NOTE:** If this function is enabled, the date/time information will be shown on the screen with a DST icon when playing back recorded video or searching video in the event list. “S” indicates summer time and “W” indicates wintertime.

### **DST Start / End**

The items are used to program the daylight saving duration. Use Direction keys to move the cursor to the next or previous field, UP / DOWN to change the settings in the selected field.

### **DST Bias**

The item allows user to set the amount of time to move forward from the standard time for daylight saving time. The available options are <30>, <60>, <90> and <120> minutes.

## 3.5 Record Schedule / Quality Setting

The Record Setup menu allows user to set recording quality, recording schedules, and other recording parameters. To setup the recording quality and schedules, you have to enter the OSD Setup Menu with correct Administrator's password. In the Main menu, move the cursor to <Record Setup> and press ENTER; the following menu is displayed.

Record Setup	
1. Record Mode	720x240@60PPS
2. Schedule Setup	
3. Preset Config	Standard
4. ezRecord Setup	
5. Circular Recording	ON
6. Purge Data	

### 3.5.1 Record Mode

The Record Mode is for selecting resolution and recording rate. The relative record settings, such as preset configuration, will follow the record mode setting. In normal circumstance, we recommend you to select <720x240@60PPS>, the default, for this item.

Move the cursor to <Record Mode> and press ENTER, then select a Record mode using UP / DOWN keys.

**NOTE:** After changing the Record Mode setting, the warning message “This will FORMAT ALL HARD DISKS and LOAD THE FACTORY DEFAULT CONFIG!” will be shown on the screen. Press ENTER to confirm the selection, then the unit starts to format the hard disks and load the factory default settings, or press ESC to abort. We strongly recommend to backup your programmed configuration before making any changes on Record Mode settings.

**NOTE:** The total PPS is shared by viewing windows (by 4, 8 or 16 windows, depends on the model you have purchased), which means, even one window is not connected with a camera and displays no video, that window still wastes pps. But if you select <ezRecord> for setting the unit, those windows with no cameras connected to them will not be recorded, in other words, the pps will not be wasted.

## 3.5.2 Schedule Setup

The Schedule Setup is used to set the day and night time, or weekend recording schedule. Select <Schedule Setup> from the Record Setup menu and press ENTER; the following menu is displayed.

Schedule Setup	
1. Day Time Start	AM 06:00
2. Day Time End	PM 06:00
3. Night Time Start	PM 06:00
4. Night Time End	AM 06:00
5. Weekend Schedule	YES
6. Weekend Start	Fri 18:00
7. Weekend End	Mon 06:00

- Make appropriate changes of the start time of Day and Night Time using Direction keys.
- Press ENTER to confirm the settings or ESC to cancel.
- If you want to have a weekend record, choose <YES> to enable the Weekend Schedule in advance and then set the Weekend Start/End time.
- Press ESC to back to previous page.

## 3.5.3 Preset Record Configuration

The <Preset Config> is used to select the preset recording quality and frame rate. In normal circumstances, we strongly suggest you set the item to <Standard>, the default. Below tables show the PPS and picture size under <Standard> in Full-D1 mode, Half-D1 mode and CIF mode, respectively:

Half-D1 mode (NTSC: 720x240@60PPS; PAL: 720x288@50PPS)			
Normal PPS	Normal Size	Event PPS	Event Size
3.75 NTSC (3.125 PAL)	11 KB	15 NTSC (12.5 PAL)	17 KB

### 3.5.4 To Record Event Video Only

If you want your DVR to record images with triggered alarm (both Alarm in and Motion) only, and stop recording under normal circumstances, then follow the steps to setup your unit:

- Enter the OSD setup menu with correct password.
- Enter <Record Setup> menu. Then select the item <ezRecord Setup>.
- Select <Daytime Record> and setup this item to <No>, which means no video will be recorded during daytime. When done, repeat the process to set the <Night record> and <Weekend Record> as well.

ezRecord Setup	
How Many Days To Record	2 Days
Daytime Record	No
Night Record	No
Weekend Record	No
Overall Recording Condition	Fair

**NOTE:** The recorded event video can be accessed not only through the Event List but also through the Date/ Time Research using the PLAY key on the front panel.

## 4. Basic Operation

The DVR allows user to access some general operations through the front panel easily. The following sections introduce the general operations of the unit.

### 4.1 Viewing Live / Playback Video

The general functions in live and playback mode are described in the following sections.

#### 4.1.1 Viewing Modes

The DVR supplies user versatile ways of viewing both live and recorded video. Following presents these view formats.

##### Viewing in Full Screen

Press any CHANNEL key directly to view the corresponding camera image in full view format.

### **Viewing in Multi-window**

Various multi-window view formats are offered for selecting. To switch between available viewing formats, press MODE repeatedly.

## **4.1.2 Digital Zoom**

Users are able to view a 2x full screen in live mode. To view the 2x full screen, follow the steps.

- Press a CHANNEL key to view the corresponding camera in full screen.
- Press ZOOM to enter a 2x full screen zoom mode of the selected camera.
- If you need to view specific area of the 2x zoomed screen, use Direction keys to pan / tilt the zoomed area around the original image.
- Either press ZOOM again or ESC to leave the zoom mode.

## **4.1.3 Viewing Live Cameras**

Users are allowed to view live camera in versatile view modes, including full-screen, 2x2, 3x3 and 4x4. The general operation under live mode is described as follows.

### **To Freeze Live Image**

Press FREEZE while viewing live image, the image pauses but the date / time information does not, and the system clock continues running.

Press FREEZE to pause the live image; press FREEZE again to resume the live camera view.

## **4.1.4 Viewing Recorded Video**

To view recorded video, user can press PLAY/STOP key directly. When press the PLAY/STOP key, the unit starts to continue playing back the recorded video from the suspended point of record. If it is the first time to use the PLAY/STOP key, the unit will playback from the very beginning of the record. Alternatively, user can select records from the Search menu to play specific video. Refer to Section [4.3 Searching Recorded Video](#) for more information.

The Forward or Reverse speed indicator will be shown on the bottom-left of the screen, when in the playback mode.

The general operations in playback mode are described as follows.

## Key Usage in Playback

The key usage is slightly changed in playback mode. Following is the key usage found in playback mode.

### **LEFT** (Reverse Playback)

The key is used to reverse the recorded video while the unit is playing back. Press the key repeatedly to increase the speed of reverse playback by 1x, 2x, 4x, 8x, 16x, or 32x.

### **RIGHT** (Forward Playback)

The key is used to play the recorded video fast forward. Press the key repeatedly to increase the speed of forward playback by 1x, 2x, 4x, 8x, 16x, or 32x.

### **FREEZE**

Press FREEZE to pause the playback video. When the recorded video is paused, press LEFT / RIGHT to resume playback video single step reverse / forward, respectively. Press FREEZE again to continue playing video.

### **PLAY/STOP**

Press to start playing back video, or to exit current mode or stop playing back video and back to live mode.

## Pause Playback and Single Step Forward

To pause and resume recorded video, follow these steps.

- Press one of the CHANNEL keys to display the corresponding camera in full screen.
- Press FREEZE to pause the current playback image.
- Press RIGHT / LEFT Direction keys to move the video single step reverse / forward. Press and hold RIGHT/ LEFT keys to reverse / forward the video single step continuously.
- Press FREEZE again to resume the playback operation.

## 4.2 Sequence Setup

This section introduce you how to view in sequence mode Main Monitor and Call Monitor, if connected. Sequence function can avoid manually backtracking and give more flexibility while surveillance.

Select certain view format and press SEQ to toggle the automatic sequential sequence, press ESC to stop sequencing.

## 4.3 Searching Recorded Video

The DVR is capable of searching and playing back recorded video by date and time or events. Entering the specific date and time of the wanted video, the unit will then search for the matched video and play it on the monitor. Alternatively, user can search event video by selecting channel as well.

In live or playback mode, press SEARCH to enter the Search menu, which is shown as follows.

```

                Search
          -----Search By Time-----
From:           2005/01/01  00:00:00
End:            2005/05/01  00:00:00
Start Time:     2005/01/01  00:00:00
                Begin Playback

          -----Search By Event-----
Select Channel:  CH1  CH2  CH3  CH4
                Event List
  
```

### 4.3.1 Searching by Time

Follow the steps to search video by date and time.

- Press SEARCH key to enter the Search menu; the From Time and End Time of the available video is listed on top of the screen. The value is unchangeable.
- Use Direction keys to move the cursor for setting the Start Time; adjusting the date and time values by UP / DOWN keys.
- Press ENTER to confirm the settings or ESC to abort.
- Move the cursor to <Begin Playback> and press ENTER to start playing back the selected video.
- Either press PLAY/STOP again to return to live video.

**NOTE:** If there is no available recorded video that matches your specified time and date, the unit starts playback from the next available video.

**NOTE:** The date/time information will be shown on the screen with a DST icon if the Daylight Saving Time function is enabled. “S” indicates summer time and “W” indicates wintertime.

## 4.3.2 Searching by Event

“Event List” allows you to search wanted video by event. The Event List is displayed as below figure:

Event List			
Date	Time	Ch.	Type
2005/03/17	11:26:50	2	Motion
2005/03/17	09:53:03	5	Alarm
2005/03/16	16:14:42	3	Alarm
2005/03/15	03:45:31	1	Motion
2005/03/12	22:27:56	1	Alarm
2005/03/12	10:09:29	7	Motion
2005/03/11	12:18:20	6	Motion
2005/03/10	05:16:00	4	Alarm
2005/03/08	17:11:37	2	Motion
2005/03/08	16:29:10	8	Motion
2005/03/08	03:22:17	2	Alarm

The list displays each event by date, time, triggered camera and alarm type. As some events are deleted, others are displayed. The latest recorded event video will be listed on the top.

Follow these steps to search event video through Event List:

- Press SEARCH to enter the Search menu.
- To search event video that has been recorded on a specific camera, use LEFT / RIGHT to move the cursor and press ENTER to select or de-select a channel.
- Move the cursor to <Event List> and press ENTER to list the event video of the selected channels. The Event List displays.
- To exit the event list, press ESC.

Follow the steps to playback video from Event List.

- Press and hold UP / DOWN to scroll through the Event List.
- Press ENTER to play back the selected event record.
- Press PLAY/STOP to return to live mode.

## 4.4 Video Export

The unit allows you to export wanted video to an external device, such as a USB ThumbDrive<sup>®</sup>, and save the video to \*.drv file.

If you want to export video to an external device, make sure the external storage has been connected to the DVR unit and the port has been set appropriately for video export.

According to the size of video, the export may take you about 10 minutes to 1 hour.

### 4.4.1 ezBurn Introduction

Built with the ezBurn technology, ezBurn function provides users the easier way to export desired video with CD-RW built in or to an external device connected, such as an USB ThumbDrive<sup>®</sup>.

TWO keys (SEARCH and COPY) and THREE touches are all you need for completing the export. The whole exporting process will be done through the front panel, but no need to enter the OSD setup menu.

The ezburn export process is illustrated as below figure:

The whole process is described step by step in the following sections.

## 4.4.2 To Export Normal Video

To Export normal video to external device, follow these step:

- Press SEARCH and play wanted normal video by entering date and time. Note if you are viewing in multiple channel mode, please make sure there is no window displaying in Live mode. Otherwise, the export won't work.
- After entering playback mode, plays the video and press COPY on the point that you want to start the export. The playback continues.
- Press COPY again on the point that you want to end the export. Now, the "ezBurn" window displays as below figure. The information shown on the window is for read only.

ezBurn confirmation  
Selected Device: Built-in-CD-RW  
All data on the disc will be erased.  
Exported Required Size = 11 MB  
Real Export Range:  
From: 2005/11/07 AM10:41:13  
To: 2005/11/07 AM10:41:21  
Enter: YES ESC: NO

- If there is no any exportable external device connected to the DVR unit, then a warning message will be shown on the screen, as below figure:

No exportable device detected.  
Please install the target device/media  
to the DVR.  
Enter: Retry ESC: Exit

- Press ENTER to start the export; or, press ESC to abort.

### 4.4.3 To Export Event Video

To export event video, follow these steps:

- Press SEARCH and play wanted event video. To play event video, refer to Section 4.3 Searching Recorded Video.
- After entering the playback mode, press COPY. The “ezBurn” window displays as below figure. The information shown on it is for read only.

ezBurn confirmation			
Selected Device: Built-in-CD-RW			
All data on the disc will be erased.			
Exported Required Size = 11 MB			
Export Event Info:			
Data	Time	Ch	Type
205/11/07	AM10:42:35	13	Motion
Enter: YES		ESC: NO	

- If there is no any exportable external device connected to the DVR unit, a warning message will be shown on the screen
- Press ENTER to start the export the whole event video to the connected device; or, press ESC to abort.

## 4.5 Deleting Recorded Video

User can delete the Normal and Event recorded video in Purge Data menu. The administrator password is required to access the function. Select <Record Setup> from Main menu, and then in Record Setup menu, move the cursor to <Purge Data> and press ENTER; the Purge Data menu is displayed.

Purge Data			
1. Purge All Data			NO
2. Purge All Event Data			NO
3. Purge Event Before		2000/01/01	
4. Start to Purge			NO

The first four items are used to select the data that should be purged. The items are described as follows. After select the data you want to purge, set the fifth item <Start to Purge> to <YES> and press ENTER to start the deleting process.

### Purge All Data

Select the item to delete all recorded video from database.

### **Purge All Event Data**

Select the item to delete all event video from database.

### **Purge Event Before**

The item is used to delete event video that recorded before a specific date. The default of this item is <2000/01/01>.

## **4.6 Dome Control**

DynaGuard™ 090 Series DVR allows user to control a dome camera by the front panel.

In Live mode, user can press CHANNEL key to display the desired dome camera in full view. To enter Dome Control mode, press the DOME key and press channel key 2 to display the hint screen; to exit the Dome Control mode and back to live mode, press ESC or DOME.

To configure the dome controls settings, see the following sections.

### **4.6.1 Dome Connection**

Follow the steps to install dome camera.

- See section [2.4 Rear Panel Connections](#) for RS-485 port pin definition.
- Refer to the following figure. Connect the R+, R- terminals on the dome camera to the D+, D- terminals on the RS-485 port by RS-485 cable respectively.

## 4.6.2 Dome Protocol Setup

The Dome Protocol item lists the available dome protocols for communicating with dome cameras connected to the DVR. From the Main menu, select <Camera Setup> and press ENTER. The following menu is displayed.

Camera Setup		
1. Camera Select		CH1
2. Dome Protocol		None
3. Dome ID		0
4. Camera Title		
5. Covert		NO
6. Termination		NO
7. Brightness		0
8. Contrast		0
9. Saturation		0
10. Hue		0

To configure dome protocol, select a camera first and set the communications protocol associated with dome camera using the Direction keys and ENTER. The available protocol includes <DynaColor>, <Pelco D>, <Pelco P>, <AD422>, <Fastrax 2> and <None> (default).

**NOTE:** The settings become effective after saving the changes and exiting from the menu.

## 4.6.3 RS485 Setup

DVR controls the domes via RS-485 communication protocol. The RS-485 parameters in DVR must be set to the same parameters as the protocol for RS-422 setup of the dome.

Users are allowed to change the RS-485 settings of the DVR. Select <System Setup> in Main menu, then select <RS485 Setup> from the System Setup menu and press ENTER. The following menu is displayed.

RS485 Setup		
1 Unit ID		224
2 Baud Rate		9600
3 Bits		8
4 Stop		1
5 Parity		None

The ID number must match the ID address set by the dome. The Unit ID is in the range of 1 to 255. The default ID is 224. Note that no two devices on the same bus should be given the same ID address, or a conflict may occur.

The default DVR RS-485 settings are 9600 Baud, 8 Data Bits, 1 Stop Bit and No Parity.

**NOTE:** The settings become effective after saving the changes and exiting from the menu.

### 4.6.4 Dome Controlling Keys

The function keys used in Dome Control are described as follows.

#### **Set / Go Preset**

This key is used to enter the Dome Preset menu to set up certain position as a preset and go to the predetermined preset positions for viewing.

#### **Toggle Hint Screen**

This function is used to avoid viewing the dome parameter information while controlling dome camera. Press this key to hide the screen. Press it again to redisplay the screen.

#### **Iris Open**

Use to open the Iris on the dome camera.

**Focus Near**

Use to focus the dome camera near.

**Zoom In**

Use to zoom the dome camera in. This function is for user to choose the viewing area, more or less of it.

**ESC**

Use to leave dome control mode and return to live and full screen viewing mode.

**Auto / Enter**

- In OSD Menu mode, the key is used to make selection.
- In dome control mode, this key is used to activate automatic focus and iris function.

**Iris Close**

Use to close the Iris on the dome camera.

**Focus Far**

Use to focus the selected dome camera far.

**Zoom Out**

Use to zoom the dome camera out. This function is for user to choose the viewing area, more or less of it.

**Pan / Tilt**

Use to pan and tilt dome camera.

## 4.6.5 Setting Preset Points

The DVR allows user to set preset positions; the amount of preset points depends on the dome manufacturer.

Follow the steps to set preset points.

- Press a Channel key to view the corresponding camera in full screen.
- Then press DOME to enter dome control mode.
- Use Direction keys to position the dome camera to desired position.
- Press 2 to view the dome control Hint Screen; press 2 again to toggle the Hint Screen.

Hint Screen	
DOME / ESC:	Exit
MODE / PLAY:	Iris Open / Close
SEQ / FREEZE:	Focus Near / Far
MENU / SEARCH:	Zoom In / Out
ENTER:	Auto Focus / Iris
◀▲▼▶:	Pan / Tilt
CH1:	Set / Go Preset
CH2:	Hint Screen On / Off
Dome Control	

- Press 1 to access the Set/Go Preset function. The Dome Preset menu is displayed.

Dome Preset		
Index	Set Preset	Go Preset
1	NO	NO
2	NO	NO
3	NO	NO
4	NO	NO
5	NO	NO
6	NO	NO
7	NO	NO

- Use UP / DOWN keys to select the desired preset number from the menu.
- Set the <Set Preset> of the selected preset number to <YES>, and press ENTER to save the position. Now the preset is set and ready to call.

## 4.6.6 Calling Preset Points

Follow the steps to call preset points.

- Press a Channel key to view the corresponding camera in full screen.
- Then press DOME to enter dome control mode.
- Press 2 to view the dome control Hint Screen; press 2 again to toggle the Hint Screen.
- Press 1 to access the Set/Go Preset function.

Dome Preset		
Index	Set Preset	Go Preset
1	NO	NO
2	NO	NO
3	NO	NO
4	NO	NO
5	NO	NO
6	NO	NO
7	NO	NO

- Use UP / DOWN keys to select the desired preset number from the menu.
- Set the <Go Preset> of the selected preset number to <YES>, and press ENTER to call the preset point.
- Now the selected dome camera rotates to the preset position automatically.
